Market Commentary – February 2017

Market Environment

Global equities rallied in February as international stocks got a boost from positive economic data and domestic equities were bolstered by expectations of corporate tax reform and deregulation. The S&P 500 returned 4.0% as major US indices hit record highs following President Trump's address to a joint session of Congress as investors interpreted a more measured approach from the administration. The MSCI EAFE Index returned 1.4% as a depreciating euro moderated gains but European companies benefited from upward earnings revisions. The MSCI EM Index gained 3.1% last month amid broad currency appreciation and a rally in Indian equity markets as they continued to recover from a late 2016 sell-off induced by the Modi administration's demonetization program.

Despite the market pricing in an increased probability of a Fed rate hike in March, yields across the Treasury curve fell slightly in February – providing a tailwind to US fixed-income assets. The Barclays US Aggregate Bond Index returned 0.7% and the Barclays Long Treasury Index was up 1.6% on the month. Credit markets continued to rally with the Barclays High Yield Index earning 1.5% as spreads tightened. Global issues were also positive in February, supported by falling German bund yields. The JP Morgan GBI-EM Global Diversified Index gained 1.8% aided by appreciating emerging market currencies, led by the Mexican peso.

We remind investors to remain disciplined in their rebalancing approach to risky assets. While the US economy appears to be on solid ground, investors have pushed US equity valuations higher amid expectations of easing regulations and tax cuts despite uncertainty around the extent and implementation of such reforms. At NEPC, we favor an overweight to international developed and emerging market equities. In Europe, we continue to observe improving economic fundamentals and a recovery in credit growth in spite of looming political uncertainties. While the case for emerging markets varies across countries, we broadly see attractive valuations, compelling long-term economic growth and renewed asset flows. In fixed income, given compressed bond yields globally, we advocate investors shift some exposure to TIPS as prospects for higher inflation have increased. We also encourage those who have benefited from the year-long spread compression in high yield to shift their exposure to a more flexible credit mandate.

Information Disclaimer and Reporting Methodology

Information Disclaimer

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to ensure profit or protect against losses.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plan's custodian bank. Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may be preliminary and subject to change.
- This report is provided as a management aid for the client's internal use only. Information contained in this report does not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC generally reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of return are annualized when the time period is longer than a year. Performance is presented gross and/or net of manager fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.
